

KEY CHANGES FOR ANIMATIONS AND BROWSER COMPATIBILITY (DESKTOP)

Nav >>>

- On hover of a navigation link, all other nav items and navigation elements dim by reducing their opacity, creating a soft fade-out effect that visually emphasizes the hovered link while keeping the rest visible.
- Make submenus appear a few seconds after clicking on the “More Help” button.
- Remove Hamburger Menu from the Desktop views.

Header >>>

- Consider adjusting the size of the images and slightly push the image with the girl running to the top.
- Other adjustments may be required during upcoming meetings.

About us >>>

- Increase the size of the image on hover.

Appointment section >>>

- Make submenus appear a few seconds after clicking on the “Choose Department” fields.

Pricing section >>>

- Make pricing cards scroll automatically only after clicking on any of the arrow buttons below.

Doctor section >>>

- Make pricing cards scroll automatically only after clicking on any of the arrow buttons below.

Find a Doctor section >>>

- Make submenus appear a few seconds after clicking on the “Choose Department” fields.

Blog section >>>

- Make the fourth blog post appear with a collapse effect only after clicking on the "Read more" button. Center the fourth blog post in the section.

Footer section >>>

- Remove underline styling from the links (it appears on hover) in the footer section.
- Design and position the “Back to Top” button like it’s presented on the Tablet and Mobile views.

Entire page >>> Work on browser compatibility for Chrome, Firefox, Safari, Edge.
